## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

Claims 77-85 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant's claim 77 so broad so as to encompass any type of physiological signal as an input whether it be related to the heart or not and then obtain a relationship between the timing of the cardiac contraction and the evolution of the signal even though not parameters concerning the heart are input to the processor. The claims are indefinite as to how this would be achieved. Claim 81 can determine a characteristic of second function of a different physiological signal even though it too is not an input or stored element in the processor. The claims are missing key elements to it operability.

### ***Allowable Subject Matter***

Claims 85-88 are allowed.
